

VoiceCraft / Kadence AI

Next-Generation AI Speech & Interview Coach

Real-Time Vocal Telemetry • STAR Method Radar • Notes-to-Questions Engine • Executive AI Rewrite

■ ■ Live Voice Wave

Web Audio Canvas

■ WPM Speed Arc

Optimal Rate Tracker

■ STAR Radar

Response Structure

■ Notes Engine

PDF / Doc Generator

THE CORE PROBLEM

Why Candidates Struggle in High-Stakes Interviews

■ ■ Uncontrolled Pacing & Velocity

Nerves cause candidates to speak too fast (>170 WPM) or pause unnaturally, making core points hard to follow.

■ Excessive Filler Word Dilution

Frequent hesitation terms ('um', 'like', 'basically') erode perceived authority and confidence.

■ Unstructured STAR Framework

Candidates fail to structure stories around Situation, Task, Action, & Result, missing key impact metrics.

■ Generic & Unfocused Practice

Generic question banks fail to prepare candidates for specific resume projects or technical notes.

THE SOLUTION

VoiceCraft AI: Real-Time Vocal Telemetry & AI Coaching

■ Live Voice Wave

Web Audio API canvas visualizer
& Web Speech STT microphone
transcription.

■ Precision Metrics

WPM speed arc gauge, filler word
ratio, & vocal confidence index.

■ STAR Radar

Multi-dimensional evaluation
scoring Situation, Task, Action, &
Result.

■ Executive Rewrite

Automated strengths, growth tips,
& executive STAR rewrite.

FEATURE DEEP-DIVE

Real-Time Vocal Telemetry & Visual Analytics

■ Speed & Filler Telemetry

- **WPM Arc Gauge:** Tracks speaking rate against 120–160 WPM sweet spot.
- **Filler Word Engine:** Detects 'um', 'like', 'basically' with count & ratio.
- **Live Pills:** Highlights filler occurrences in real-time transcript viewer.
- **Confidence Index:** Continuous vocal stability score calculation.

■ STAR Framework Radar

- **Situation (25%):** Evaluates background context and team setup.
- **Task (25%):** Validates problem definition & engineering goal.
- **Action (25%):** Assesses specific personal execution steps.
- **Result (25%):** Scans for quantitative metrics (% latency, revenue).

SMART QUESTION GENERATION

Notes-to-Questions AI Engine

01

Upload Material

Drag & drop .txt, .md, or .pdf files.
Powered by client PDF.js parsing.

02

Concept Extraction

Keyword extractor identifies
technical terms & milestones.

03

Question Gen

Maps concepts into 5-8 custom
STAR & technical questions.

04

1-Click Practice

Click generated question card to
launch live vocal practice.

AI COACHING ENGINE

Automated AI Feedback & Executive STAR Rewrite

■ Automated Feedback Insights

- ✓ **Strengths:** Clear action verbs & logical technical sequencing.
- ■■ **Growth Tips:** Pacing dropped in technical section; quantify Result impact metric.

■ Executive STAR Rewrite

Raw: 'Um, so we had this issue with slow database queries...'

Executive Rewrite: 'I led database optimization (S/T) by implementing Redis query caching (Action), reducing P99 latency by 45% (Result).'

TECHNICAL ARCHITECTURE

System Stack, Data Flow & LLM Schema

Frontend UI & Visuals

React 18, Vite, Tailwind CSS, Recharts radar/arc, Lucide Icons.

Audio Telemetry

Web Audio API AnalyseNode, Web Speech STT, WPM calculator.

Document Engine

FileReader API, client PDF.js parser, localStorage session vault.

LLM Orchestration

Validated JSON schema, modular prompt, GPT-4o / Gemini / Claude.

PRODUCT ROADMAP

Roadmap to Next-Gen Voice Coaching

Phase 1 (Completed) — Web Voice Telemetry & Notes Engine

Real-time WPM, filler word detection, STAR radar, PDF parser, session history.

Phase 2 (Q3 2026) — Multimodal Video & Gesture Telemetry

Eye contact tracking, facial micro-expressions, body posture scoring.

Phase 3 (Q4 2026) — Adaptive AI Conversational Interviewer

Real-time voice avatar asking adaptive follow-up questions & team dashboards.
